

Wellington Multi-Asset High Income Fund

Important Information

1. The Fund aims to deliver a regular income, with a secondary focus on capital growth by primarily investing either directly or indirectly in global assets including equities, sovereign, corporate and inflation linked bonds.
2. The Fund is therefore exposed to a range of investment risks including but not limited to equity market risks; risks related to fixed income and debt securities and risks associated with investing in emerging markets.
3. The Fund uses a dynamic asset allocation strategy which may incur greater transaction costs when rebalanced periodically and may not achieve desired result under all conditions.
4. The Fund may also invest in debt securities with loss absorption features which are subject to higher risks when compared to traditional debt instruments.
5. The Fund may also be exposed to currency risks where the underlying investments of the Fund may be denominated in currencies other than the base currency of the Fund or the share class.
6. The Fund may use financial derivative instruments (FDIs) for investment and hedging purposes. The use of leverage can result in a loss significantly greater than the amount invested in the FDIs by the Fund. Exposure to FDIs may lead to a high risk of significant loss by the Fund.
7. The Fund may at its discretion pay dividend out of the capital. The Fund may also at its discretion pay dividend out of gross income while charging all or part of the Fund's fees and expenses to the capital of the Fund, resulting in an increase in distributable income for the payment of dividends by the Fund and therefore, the Fund may effectively pay dividend out of capital. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the Fund's capital or payment of dividends effectively out of the Fund's capital (as the case may be) may result in an immediate reduction of the net asset value per share/unit. The distribution amount and net asset value of a hedged share class may be adversely affected by differences in the interest rates of the reference currency of the hedged share class and the Fund's base currency, resulting in an increase in the amount of distribution that is paid out of capital and hence a greater erosion of capital than other non-hedged share classes.
8. Investors should not make investment decisions based on this document alone. Investors should refer to the Prospectus and Key Facts Statement for details including risk factors.
9. The Fund's investment portfolio may fall in value and therefore your investment in the Fund may suffer losses. There is no guarantee of the repayment of principal.

ABOUT US ❖

Tracing our history to 1928, **Wellington Management** is one of the largest independent investment management firms in the world.

^ Dividend may fluctuate and is not guaranteed. Annualised yield = (distribution per unit / share * intended dividend frequency per year) / NAV on ex-dividend date. Annualised yield is calculated using the distribution rates and NAV rates processed into the NAV declared on ex-dividend date. For further information including the ex-dividend date used, please refer to the dividend composition document located on our website: www.wellington.com.hk. The Fund intends to pay dividends from income and profits, but if these are insufficient, they may be paid from share capital. Dividends are calculated gross (before deduction of fees, expenses and taxes), and while this increases the dividend, it may erode capital. A positive distribution yield does not imply a positive return. Hedged share class dividends may be impacted positively or negatively by the difference in interest rates between the share class currency and the Fund's base currency.

The individual issuers listed should not be considered a recommendation to buy or sell. The weightings do not reflect exposure gained through the use of derivatives and commodity exposure via ETFs. Holdings vary and there is no guarantee that the Fund currently holds any of the securities listed. Please refer to the annual and semi-annual report for the full holdings. The top 5 holdings shown by equity and fixed income do not reflect exposure to cash and cash equivalents such as exchange traded funds.
